No bird soars too high
if he soars with his own wings

William Blake

The warm and deepest grateful acknowledgement to my beloved wife
Jeng Niek and my children Ardhi and Anna and my grand children Sissy,
Mima and Byan for their support in writing this handbook.
ACKNOWLEDGEMENT

As we have known that the development of aviation technology – equipment as well as procedures – has grown rapidly in such a way that the huge steps are necessary to be taken in order to catch up with development.

The vision of the ICAI is to produce the graduates who are nationally and internationally recognized. The mission of the ICAI is to conduct the education and training of applied technology in civil aviation in line with the national goal to promote intellectual society by creating human resources in the field of civil aviation who possess a high degree of faith and devotion, international quality, competitiveness and professionalism.

In relation to the above mentioned, the preparation of this handbook has provided great assistance in promoting the quality of human resources by continuous promotion of education and training quality through various literature.

I wish the ICAI Civitas Academica particularly the lecturers and students will get the benefit of this handbook for widening their knowledge and use it as a reference to promote the quality of learning process. To achieve such goal, I also hope lecturers and students to be able to write/rewrite/translate other handbooks to help support and promote the capability and the quality of the ICAI.

My grateful acknowledgement and congratulation to Mr. AMINARNO BUDI PRADANA for his consistency and relentless effort in developing and producing this kind of handbook.

Curug, 21 Oktober 2003
